

AboveNet™

AboveNet Low-Latency Transatlantic Service

Fast High Bandwidth Connectivity between New York and London

About AboveNet

AboveNet, Inc. provides high bandwidth connectivity solutions for business and carriers. Its private optical network delivers key network and IP services in and among top U.S. and European markets. AboveNet's network is widely used in demanding markets such as financial services, media, health care, retail and government.

Why AboveNet?

Scalability - Dedicated networks that scale from 100Mbps to 40Gbps

Low Latency – Direct fiber routes and carrier class electronics provide low latency networks

Security – Owned and operated fiber optic network which bypasses legacy networks

Reliability- Virtually error-free service supported by 24x7/365 and enabled by our years building

Data Center Connectivity – The next generation data network superhighway that interconnects to key data centers

Serving Financial Services – The World's Most Demanding Industry

The global financial services industry, comprising banking, foreign exchange, investment services, insurance, private equity and venture capital firms, constitutes the largest group of companies in the world in terms of earnings and equity market cap. In today's fast-paced and intensely competitive markets, the success of financial services companies hinges on the speed and reliability of transactions – a function of the underlying network.

Introducing Low-Latency Transatlantic Connectivity for Global Financial Leaders

To meet the needs of the world's vital financial institutions, AboveNet has launched a new Gigabit Ethernet service between New York and London, providing one of the industry's fastest end-to-end transatlantic connections for demanding critical low latency applications including foreign exchange trading and market data feeds.

Whether to support the extreme low-latency required for algorithmic trading, the secure completion of financial and banking transactions, or the physically diverse network connections that provide critical disaster recovery paths, AboveNet's high bandwidth connectivity solutions set the industry standard for speed and security. As the recognized leader in meeting the stringent network requirements of financial services companies, AboveNet is extending our capabilities with this transatlantic service.

Breadth of Metro Reach in New York and London Financial Districts

AboveNet's low-latency transatlantic service reaches key financial locations in:

- London: Slough, The City and Docklands
- New York Metro: Manhattan and New Jersey, including: Newark, Weehawken, Secaucus, Carteret, and Clifton

Features and Benefits

- One of the Lowest latency routes between New York and London
- GigE Unprotected Circuit
- Select Agility Latency Guarantee (POP-POP)
- Tailored Latency (End to End) SLAs available
- Sub-1ms round-trip Metro access to hundreds of buildings in the New York and London metro markets.
- High bandwidth connectivity from London to major U.S. metro markets

Service Guaranteed by Industry's Best SLAs

AboveNet's Low-Latency Transatlantic Service is backed by AboveNet's Agility Guarantee program, one of the industry's most respected SLAs. Guarantees are provided by combining one of the shortest transatlantic routes with the most direct terrestrial backhaul links into New York and Slough.
