Break the Speed Barrier, Get Connected to dcXchange

AboveNet has created the high performance, cost-effective network for carrier interconnect between vital Data Centers in the San Francisco/San Jose Bay area. This strategically meshed network produces unsurpassed connectivity with elegant simplicity. A rock solid DWDM core platform locks together high traffic locations with key Data Centers in the metro area for seamless wave carrier interconnections. AboveNet's dcXchange is service-ready. It offers your enterprise or carrier organization pre-deployed facilities that deliver proven optical performance to easily accessible Meet Me Rooms and collocation sites.

A Plug and Play Solution To Support Your Applications

The right choice for high-performance metro Data Center connectivity, dcXchange provides unsurpassed flexibility to get your personnel connected to where they need to go, fast. DWDM core direct links offer simplicity and performance with AboveNet's pre-provisioned dcXchange. In today's fast paced, ever-changing business environment, there is a compelling need to reduce costs, increase services and reach more of your customers. dcXchange is the answer to the need for high value Data Center connectivity, with unlimited scalability to meet your changing requirements. As new technologies drive underlying carrier bandwidth uses, dcXchange can enable you to reach those Data Centers where enterprises like yours seek high performance connectivity.

Features and Benefits

- Dedicated Fiber
- Data Center to Data Center
- DWDM Core Platform
- Managed Waves
- SONET/SDH/Ethernet handoffs
- GbE Bandwidth
- Protected and unprotected options available
- Disaster Recovery/Business Continuity
- 24x7/365 Network Management Center
- Circuit Portability
- Term Agreements
- Load Balancing
- Backup, Failover
- Traffic Aggregation for IP & Media
- Provisioned point-to-point, or back-to-back across two nodes
- Virtualization of Collocation

dcXchange is ideally suited for:

- Quick deploy for Carrier connectivity needs
- Virtualization of Scarce Collocation Space
- International Connections
- Long Haul Connections
- Content Providers
- Service Providers
- Alternative Connections
- Traffic Aggregation
- Media and Content Providers
- Wireless Backhaul
