**Work Securely and Cost-Effectively With Your Creative Community
File based work flow taken to a higher level!**

Do you need to work with:

- Motion picture studios
- Sound stages
- Post production facilities
- Broadcasters
- Sound editorial companies
- Game developers
- Or to offer services to the creative community

Let jabNET securely connect you to the locations in your creative community for collaboration, review and approval:

- Move files and share storage between locations
- Expand rendering – through outside resources
- Collaborate on any project: Editing Film, Video, Audio, Color Correction, and EFX
- Live Video SD and HD
- Collaborate – share screens, Send content between creation points (Production), Join diverse artistic teams (Post Production)

Are you a Producer, Editor, or Special Effects (EFX) supervisor?

Then jabNET can secure your screenings:

- Stream high resolution images to jabNET™ locations
- Keep content at secure location(s), not at vulnerable screening site(s)
- Send stream to one or many sites

Compare jabNET To These Content Transfer Methods

Public Internet	AboveNet
Internet shared connections may be compromised	jabNET connections are private, not shared – offering the speed and privacy of a series of point-to-point connections, but without the cost, while the public Internet is the pirate's paradise
"Free" Internet often produces unpredictable results, not suitable for real-time collaboration	
Shipping Companies	AboveNet
Acceptable when sending a large package of files but costly when sending small files many times during the day	jabNET is cost-efficient real-time collaboration and near real-time content sharing
Not very collaborative	
Leasing Private Circuits	AboveNet
Expensive, no community access	jabNET securely connects you to your industry peers
Video Services	AboveNet
Designed for video not for files	jabNet was created from the ground up to handle content in any resolution, including: Digital Intermediate, Digital Cinema, 3D, VOD, HD production elements, live streaming

Turning Ideas into reality at the speed of light™

What is jabNET

jabNET is a private network for Motion Picture, Television, and media content creators. This high speed fiber optic network was created by leveraging AboveNet's experience and success in delivering 1000's of private connections for every major industry.

jabNET Provides You These Benefits:

- Secure, easy to use alternative to the public Internet
- Fast and efficient file based workflows
- Private network: one to many and many to one
- VPN protection for each connection
- Self Provisioning -you can open and close connections to your business partners
- No need to purchase private lines with all of your business or trading partners
- Any video-to-IP device or tool can be used on jabNET
- Multiple connections can be opened at once
- Designed and ready for your future growth

Your creative content will race over jabNET's high speed, high bandwidth network to securely arrive at your business partner's location.

Tools And Connectivity to speed your project across town or across the world.

jabNET is the first high speed US-based service designed for: real-time collaboration, transmission of live video, sound, video, effects , digital intermediate and film resolution frames, between you and the creative community. It offers you:

- The 1 Gigabit speed of a dedicate private line service without the high cost
- Tracking and Utilization Tools: control costs and track content movement
- Know where your content went and when it arrived.
- You and your users can setup and tear down connections, and send precisely when you need to.
- Introduction to other jabNET partners, your creative peers.

Expand your business by leveraging the community while putting your team in the company of media giants. Gain introduction to other jabNET partners, your creative peers.
